

1. Information:
CREE-T6 lights lamp, highest brightness of 3600 lumens, life 100000 hours!
2. Intelligent control circuits, three gears light circuit.
3. Middle light XML-T6 lamp, current output 2.0A, the brightness of 1200LM;
Secondly two XML-T6 lamp, current output 4.0A, the brightness of 2400LM;
Three gears: Three XML-T6 lamp with light output current 6.0A, brightness as high as 3600LM.
4. Vacuum plating mirror reflective, high temperature resistant, prevent fall off, the effect is perfect.
5. Case in aluminium, CNC machining, anodic oxidation surface treatment.
6. Power: Use 4*18650 secured battery, capacity: 4400MAH, voltage: 8.4V, work continuously 3 to 4 hours.
7. Mount in on the bike, as a lamp use; Elastic deck, suitable for various types of bicycles, easy to remove and mount.
8. Note: When charging, put in a safe place, don't charge near of open fire.
Note 2: Do not remove the battery under use, It will affect the product performance and circuit can get broken.
